

**In the name of Allah, the Gracious, the Merciful**  
**To / The Honorable Wali of Ninawa**  
**Subject / A Grievance and Complaint**

I, the Muslim, [REDACTED]. I'm the owner of [REDACTED] in the Wadi 'Akab Industrial district – al-Saydin, which is across from the weapons manufacturing workshop of the Diwan of Manufacturing (Faraj al-Nasrani Garage previously).  
On last Rabi' al-Awwal 1436 [December 2014-January 2015], an explosion happened inside the workshop due to an error that happened there and not due to the aerial bombing of the infidels. That explosion caused me many damages, it destroyed windows, false ceiling, kitchen and food. Then customers and workers started to avoid coming to the restaurant, fearing the occurrence of accidents, which resulted in closing it for eight months and I was out of business. Until now, I suffer from ongoing losses for the same reason and the accumulation of the State real estate rents, which so far amounted to about one and a half million, with the suspension of my livelihood and my inability to pay the rent of my house belonging to the real estate of the Islamic State. The brothers from the workshop said to me: Count your losses so you can be compensated. Thus I went to the administrator in charge of the workshop, brother Abu Tamim. He said to me, after I waited for very long time, "Write the grievance to me and I will submit it to the judiciary." So I wrote the grievance and handed it over to him on last Rajab. He said to me, "Do not follow up with anyone because we will send it on your behalf." Three months later, I went back to him, but his language had changed. He said to me, "Follow up with the judge of the grievance. Your claim is there." So I went to the grievance [judge], but couldn't find my claim there. I kept going back and forth between the grievance and the manufacturing until the brothers in the judiciary said to me: Bring the grievance claim from Abu Tamim. So I went to him, but he said to me, "Do not go anywhere because it was just an accident. So sit tight and shut up." Now I am overwhelmed with losses, debts, and real estate wants to confiscate my restaurant and get me out of the house for not paying the rent. For this, I demand the sum of three million and the accounting of the administrator in the manufacturing (Abu Tamim).

**Note:** The witnesses are the same brothers in the aforementioned workshop.

May Allah reward you the best.
